

Illinois Academy of Family Physicians Endorses Healthy Interactions Diabetes *Conversation Map* Program

The IAFP endorses the Healthy Interactions *Conversation Map* program for Diabetes, used to help millions of patients around the world with type two diabetes live healthier, happier lives.

The Healthy Interactions diabetes *Conversation Map* tools have become the standard of care for patients around the world. Millions of patients have participated in sessions in over 120 countries. The IAFP recommends the Healthy Interactions reimbursable program to practices looking to add on-site diabetes education, facilitated by a highly trained healthcare professional.

Healthy Interactions recently launched an “In-Practice Diabetes Education Program” through which they deploy an education program into physician practices to augment the services that family practices offer their patients. The family physician, as the “quarterback” of the patient care, can choose to recommend diabetes education to a patient newly diagnosed with diabetes or one that has been living with diabetes and would benefit from refreshed strategies and peer support. The sessions are held on-site at the practice.

The Healthy Interactions *Conversation Map* program is a dynamic, group-based, patient-centered learning approach that integrates members of the patient’s support network. Healthy Interactions deploys a highly trained healthcare professional with a specialty in diabetes to the practice to host weekly education sessions. Medicare and most private payers reimburse for up to 10 hours of diabetes education.

“We admire the mission of the IAFP and are thrilled to extend the reach of our program into family medicine practices,” Paul Lasiuk, CEO of Healthy Interactions.

A global leader in health education, Healthy Interactions, Inc. is devoted to driving Personal Health Engagement – their term for helping individuals commit to healthier actions. Founded in 2003, Healthy Interactions is headquartered in Chicago, Illinois, USA. To learn more, please visit our website at www.healthyinteractions.com.
