

he American College of Healthcare Executives Healthcare Executive Competencies Assessment Tool is offered as an instrument for healthcare executives to use in assessing their expertise in critical areas of healthcare management. We trust you will find this latest edition of the assessment tool useful.

The competencies are derived from job analysis surveys of healthcare executives across the healthcare continuum so that they are aligned with the challenges and work experienced by leaders today.* They represent knowledge needed to successfully perform as a healthcare manager regardless of the setting. ACHE updates the assessment annually. For your convenience, a complete list of ACHE resources, including readings, programs, assessments and self-study courses, are included in the back of the directory and referenced in each section.

The self-assessment is designed to help you identify areas of strength and areas you may wish to include in your personal development plan. You may choose to have your immediate supervisor use the tool to assess you and then compare results from your self-assessment with perceptions from your supervisor. Used in such a manner, the competency self-assessment can be a powerful tool in facilitating feedback about gaps in skills necessary for optimizing performance. Another way to use this assessment is to share the results with your mentor and work toward addressing identified professional growth areas.

Healthcare organizations also may choose to use this assessment tool to better define the requirements of specific roles within the organization. Once defined, the organization then can respond with a targeted training and development plan for those roles. Certain tasks also may require teams with a blend of strengths, and the self-assessment tool can be used to arrive at an ideal skill mix among such teams. The competency tool provides a common framework and lexicon for a variety of healthcare managers in a range of roles and settings; they serve to define the field. They can be used for individual as well as team self-assessment and improvement.

New this year is a sub-domain (under Business Skills and Knowledge) of Patient Safety, emphasizing competencies required and knowledge needed to address the core leadership challenges of achieving zero harm for both patients and the workforce. While specific components of a patient safety and quality strategy will vary by organization, ACHE believes healthcare executives should lead a comprehensive approach to ensuring patient safety and quality. As supporting documents for this sub-domain, use *Leading a Culture of Safety: A Blueprint for Success* and *Free from Harm: Accelerating Patient Safety Improvement Fifteen Years after To Err Is Human* for understanding and advancing patient safety in your organization. These tools can be downloaded at **ache.org/Blueprint** and **npsf.org/freefromharm**.

Within the Healthcare Executives Competency Assessment Tool, the competencies are categorized into five critical domains: Communication and Relationship Management, Leadership, Professionalism, Knowledge of the Healthcare Environment, and Business Skills and Knowledge. The definitions for the domains are as follows:

*derived from HLA Model

1. Communication and Relationship Management

The ability to communicate clearly and concisely with internal and external customers, establish and maintain relationships, and facilitate constructive interactions with individuals and groups.

Communication and Relationship Management includes:

- A. Relationship Management
- B. Communication Skills
- C. Facilitation and Negotiation

^{*} The directory was derived from job analysis surveys conducted by Healthcare Leadership Alliance associations. In addition to the American College of Healthcare Executives, other members of the Healthcare Leadership Alliance are: American Association of Physician Leadership, American Organization of Nurse Executives, Healthcare Financial Management Association, Healthcare Information and Management Systems Society, and the Medical Group Management Association.

2. Leadership

The ability to inspire individual and organizational excellence, create a shared vision and successfully manage change to attain the organization's strategic ends and successful performance. According to the HLA model, leadership intersects with each of the other four domains.

Leadership includes:

- A. Leadership Skills and Behavior
- B. Organizational Climate and Culture
- C. Communicating Vision
- D. Managing Change

3. Professionalism

The ability to align personal and organizational conduct with ethical and professional standards that include a responsibility to the patient and community, a service orientation, and a commitment to lifelong learning and improvement.

Professionalism includes:

- A. Personal and Professional Accountability
- B. Professional Development and Lifelong Learning
- C. Contributions to the Community and Profession

4. Knowledge of the Healthcare Environment

The understanding of the healthcare system and the environment in which healthcare managers and providers function.

Knowledge of the Healthcare Environment includes:

- A. Healthcare Systems and Organizations
- B. Healthcare Personnel
- C. The Patient's Perspective
- D. The Community and the Environment

5. Business Skills and Knowledge

The ability to apply business principles, including systems thinking, to the healthcare environment.

Business Skills and Knowledge includes:

- A. General Management
- B. Financial Management
- C. Human Resource Management
- D. Organizational Dynamics and Governance
- E. Strategic Planning and Marketing
- F. Information Management
- G. Risk Management
- H. Quality Improvement
- I. Patient Safety

Healthcare executives should demonstrate competence in aspects of all five domain areas. As you work your way through the self-assessment tool, we hope you will find it valuable and that it helps you along the path of lifelong professional education as you face the ongoing challenges of leadership. We have made it available as a PDF file at **ache.org/CareerResources** and hope you will share it with other healthcare executives.
