## Peoria Essential Evidence Update

Essential Evidence Update is coming to Peoria! Join the IAFP and the University of Illinois College of Medicine for a two-day conference that will provide an engaging, rapid-fire review of the most important research publications of the past two years. The panel of expert Family Physicians will present and critically appraise new research evidence and meta-analyses that will either change your practice or confirm that your current approaches are supported by solid evidence from randomized trials and other high-quality studies. This CME activity is designed to address primary care clinicians' knowledge and educational needs through short presentations that review and analyze recent findings from pertinent clinical research, with a specific focus on research studies that have immediate implications for practice.

### Learning Objectives

**Using an engaging, rapid-fire, literature review format for presentations & discussions, attendees will be able to;**

- Be aware of and interpret the most recently published data from research and clinical trial articles that have clinical implications for family medicine
- Describe updates in clinical decision tools for screening and differential diagnosis of those diseases;
- Compare and contrast the efficacy and safety of new pharmaceutical treatments and those with newly expanded indications;
- Review evidence-based clinical practice guidelines with implications for family medicine
